

URIEL EZEQUIEL ORTIZ ROSALES

urielortiz.xyz (Portfolio) | urielortizrr@gmail.com | github.com/UrielOrtizv1000

Computer Systems Engineering Student | Cloud / IT Support | Frontend Jr. | Applied AI | English C1

PROFESSIONAL PROFILE

Computer Systems Engineering student (7th semester) with experience in IT support, customer service and process documentation. What I enjoy the most is setting up servers and watching them work: I run my own notes, movies and P2P communication services on equipment I manage, and I take care of them as if they were real production. I work with a method: first I make a work plan, then I follow it step by step and, at the end of each phase, I debug errors and adjust whatever is needed before moving on.

EDUCATION

Universidad Autónoma de Aguascalientes — Computer Systems Engineering 7th semestre August 2022 - Present
Training focused on databases (design, normalization and administration) and on deploying web applications with a well-protected backend. Security is worked on throughout the degree, from development agents to the final services.

TECHNICAL SKILLS

Languages and frontend: HTML, CSS, JavaScript, Bootstrap, LocalStorage.

Backend and APIs: REST APIs, HTTP endpoints, FastAPI fundamentals, technical documentation

Cloud and tools: Git/GitHub, Docker, Kubernetes fundamentals, Azure fundamentals, ITIL, AI agents (LLMs), Obsidian.

Processes and support: Request management, incidents, case tracking, sensitive data, documentation.

FEATURED PROJECTS

Resiliencia-Kubernetes — *Microservices system deployed on Kubernetes (Academic project)*

GitHub: github.com/AzaelFajardo/Resiliencia-Kubernetes

Microservices system that tests how an application behaves on Kubernetes when a service fails and how it recovers, built with Python, FastAPI, Docker and Docker Compose.

- I was responsible for generating 50,000 simulated users to test it in near-real conditions, in addition to refactoring and organizing the code, running the resilience tests and documenting observability with Prometheus, Grafana, Jaeger and OpenTelemetry.

bookIA-store — *Online book store (Academic project)*

GitHub: github.com/UrielOrtizv1000/bookIA-store

Online store where users search, consult and buy books, with Angular on the frontend, Node.js on the backend and MySQL for the data.

- Built the frontend structure and navigation, developed the visual components and improved the usability of the purchase process

Ecommerce-API-EquipoTokioona — *Online store (Academic project)*

GitHub: github.com/UrielOrtizv1000/Ecommerce-API-EquipoTokioona

Online store with product catalog and basic purchase flow, with HTML, CSS and JavaScript on the frontend and Node.js, Express and MySQL on the backend

- Organized the frontend and backend, developed routes and controllers, connected the database and refactored code as a team.

PROFESSIONAL EXPERIENCE

Teleperformance — Comcast — *Customer service representative / Billing, Sales & Repair*

April 2020 - October 2020

- Management of customer requests in billing, sales and technical support through internal service platforms.
- Handling of accounts, invoices, call history and sensitive data within corporate interfaces.
- Case tracking related to payments, service and repair, applying ITIL fundamentals in request handling, incident management, tracking and case closure.

Centro Alfabiotista de Corrección y Balanceo — *Administrative support, documentation and process improvement*

January 2024 -

- Organization and improvement of internal documentation, taking care of clarity, precision and standardization of information.
- Data review in the product acquisition system, including prices, records and information consistency.

November 2026

OTHER PROJECTS

NOVA — *Private Discord-style messaging app for two people (in development)*

GitHub: github.com/ejemplo/ejemplo

Private chat app: messages with 15-day retention, calls and screen sharing at 1080p60fps. Built with Electron, with a self-hosted server securely exposed with Cloudflare Tunnel.

- Led the entire project: interface, real-time communication and server, developed with an AI agent that I configured and supervised at every stage.

Intercambio Mágico (gift-exchange-web-app) — *Secret Santa website with restricted draws (Academic project)*

GitHub: github.com/UrielOrtizv1000/gift-exchange-web-app

Website to organize gift exchanges: create the event, add participants, define who cannot gift whom and run the draw respecting those rules. 100% front-end, with HTML5, CSS3, JavaScript, Bootstrap and localStorage.

- Designed the draw algorithm with exclusions, built the drag & drop interface and implemented data persistence in the browser.

DevProfile (devprofile-cv-generator) — *Online resume generator*

GitHub: github.com/UrielOrtizv1000/devprofile-cv-generator

Web application to create a resume from scratch: edit your data and sections, see the live preview, review your skills in charts and export the result to PDF. Built with React, Vite and Context API.

- Built the editor, the live preview and the PDF export, and deployed the app automatically to GitHub Pages with GitHub Actions.

CURSOS E IDIOMAS

Cursos:

- ITIL 4 Foundation: Service Management — Udemy.
- Microsoft Azure Administrator Associate AZ-104 — Udemy.

Idiomas: Native Spanish. Advanced English C1..
